# Alexander Zashev

Junior Web Developer

I am an ambitious and dedicated programmer with a diverse educational background in Business Management and Tourism. Having garnered over a year and a half of experience in various programming languages and web technologies through SoftUni courses, I have honed my skills in Django for web development and deepened my understanding of Python algorithms. Passionate about bringing ideas to life, I am committed to continuous growth and always seek out challenges that further expand my capabilities. As I navigate the ever-evolving realm of web development, my objective is to deliver cutting-edge solutions that resonate with modern user needs.

WORK EXPERIENCE

Technical Support
FastComet ⬈

02/2020 - Present   *Plovdiv, Bulgaria*
Web Hosting
Achievements/Tasks

- As a Technical Support Specialist at a web hosting company, I provide assistance and expertise in various aspects of web hosting, server management, and content management systems within a Linux environment. My daily tasks involved using the Linux terminal to troubleshoot and resolve website issues, handle plugin conflicts, perform website reconfigurations with different domains and subdomains, and transfer websites. To ensure effective problem-solving, I demonstrated strong research and analytical skills, leveraging a wide range of resources to identify and implement the best possible solutions. I also installed and configured services such as LiteSpeed, BitNinja, Redis, CloudLinux, Imunify, and Offsite Backup solutions. Gaining hands-on experience with Linux servers, WHM, cPanel, MySQL, and SSL Certificates, I deployed various scripts to enhance server performance and security. My strong Linux experience allowed me to navigate and manage server environments efficiently. Furthermore, I supported clients using popular CMS platforms such as WordPress, Joomla!, and Magento, as well as email hosting solutions utilizing IMAP and POP3 protocols. Overall, my experience with Linux and the terminal played a vital role in my daily responsibilities as a Technical Support Specialist.

KYC/AML Analyst
SBTech ⬈

09/2018 - 12/2019   *Plovdiv, Bulgaria*
Sports betting
Achievements/Tasks

- As a KYC/AML Analyst, I played a crucial role in ensuring compliance with Know Your Customer (KYC) and Anti-Money Laundering (AML) regulations. My primary responsibilities included verifying customer identities, conducting background checks, and performing risk assessments. Utilizing strong research and analytical skills, I gathered and analyzed information from various sources to create comprehensive lifestyle assessments for individuals. This process involved identifying potential red flags and ensuring that all necessary due diligence was conducted to maintain the highest standards of regulatory compliance.

WORK EXPERIENCE

Store Owner
Estriza

12/2015 - 09/2018   *Stamboliyski, Bulgaria*
Tobacco, Drinks & Coffee store

Achievements/Tasks
- As the owner of a tobacco, drinks, and coffee store, I was responsible for overseeing daily operations, inventory management, and sales strategy. I honed my skills in customer service, problem-solving, and decision-making while maintaining a strong focus on business growth and profitability. This experience provided me with a solid foundation in entrepreneurship, adaptability, and multitasking in a specialized retail environment.

Bartender
Santa Marina ↗

05/2013 - 08/2015   *Sozopol, Bulgaria*

Achievements/Tasks
- As a Bartender at a beach bar, I provided exceptional customer service in a fast-paced, high-pressure environment, mainly serving international customers. I demonstrated strong communication, teamwork, and problem-solving abilities as I prepared various cocktails and ensured guest satisfaction. This role allowed me to develop strong interpersonal skills, cross-cultural communication, and the ability to manage multiple priorities simultaneously.
