# Alexander Zashev

Junior Web Developer

I am an ambitious and dedicated programmer with a diverse educational background in Business Management and Tourism. Having garnered over a year and a half of experience in various programming languages and web technologies through SoftUni courses, I have honed my skills in Django for web development and deepened my understanding of Python algorithms. Passionate about bringing ideas to life, I am committed to continuous growth and always seek out challenges that further expand my capabilities. As I navigate the ever-evolving realm of web development, my objective is to deliver cutting-edge solutions that resonate with modern user needs.
